

Features collected from survey

- Highlights
[People who can't watch the full game always depend on highlights]
- Live voice commentary
[It is a mandatory feature for all sports apps]
- Stats & News
[Helps to know stats of all matches and cricket related news]
- Video quality control
[Often video quality changes randomly without the knowledge of the user in most apps]
- Precise notifications
[Notification always appear after the match is started in all apps]
- Fantasy league
[Can play fantasy league within the app]
- Pin to screen
[People can perform other tasks by keeping the scorecard in the background]
- Player profiles
[Player profile like ICC rankings, runs taken, wickets taken etc. are available]
- Video download option
[Helps people to share the moments of the game with others]

- Dark mode
[More readability without eye pain at dark]
- Lite version
[It helps in reducing data consumption and free up space in mobile]
- Brightness control
[Helps to adjust video streaming brightness without affecting system brightness]
- Playback speed control
[Non-live matches can be viewed at any speed. Example - 2x, 1.5x.....]
